EDUCATION

GGSIU (Akhilesh Das Gupta Institute of Professional Studies)

Bachelor of Technology in Computer Science and Engineering

Aug 2024 – May 2028 (Expected)

New Delhi, India

AWARDS & ACHIEVEMENTS

- **IEEE T-Hacks 8.0: 2nd Place** among **800+ participants** in a 24-hour hackathon.
- **eDC's Blueprint 6.0, IIT Delhi:** Competed till Delhi Regionals round. **Got invited to Emergence, IIT Delhi's** Flagship incubation program as well as got **BeCon'26** special invitations.
- **Shloka Decode 2.0, NSUT:** Emerged **Winner** among 500+ participants in an 8-hour hackathon.
- **B-Plan e-Summit 2025, DTU:** Top 10 among 500 participants.
- **VibeForge'26: Winner** among 500+ participants in an 8-hour hackathon.
- **Pitch Tank, DU: 2nd Place** among 500+ participants.

PROJECTS

Onyx — AI-Powered DAST Platform | Python, Security Tools, GitHub App Api, Llama (github.com/Atharv-tw/Onyx)

- Built a **high-concurrency vulnerability detection engine** integrating Subfinder, Nmap, and Nuclei with custom probes for **SQLi, SSRF, and IDOR** detection.
- Developed an **AI-driven triage system** using Llama (3.3 70b) models to analyze raw scanner outputs, achieving **90%+ accuracy** in deduplicating positives.
- Integrated automated remediation through the **GitHub App API**, generating verified security Pull Requests and reducing Mean time to repair (**MTTR**) by **~70%**.

AI Health Companion — Context-Aware Health Platform | RAG, AI Agents, FastAPI (github.com/Atharv-tw/health-companion)

- Built a **safety-first, context-aware AI health platform** using RAG, user history, and strict guardrails to explain symptoms and medical reports without diagnosing.
- Implemented **8 context-aware AI agents** with report analysis, multi-assistant routing, and emergency escalation workflows.

Finstar — Gamified Financial Education Platform | Flutter, Firebase, Supabase (github.com/Atharv-tw/FINSTAR)

- Developed **4 interactive game modules** — Life Swipe, Budget Hero, Market Explorer, and Quiz Battle — with emotion aware scoring designed for Gen-Z learners.
- Designed a **Firestore-backed database** with Supabase Edge Functions for data integrity and atomic operations and game modules with **structured financial-learning content**.

EXPERIENCE

FoundU

Jun 2026 – Aug 2026

Full-Stack Intern

Remote

- Built the **end-to-end founder onboarding experience** across landing, authentication, and profile completion, connecting frontend and backend workflows.
- Developed the **founder AI chat interface**, integrating it with AI-powered workflows and founder profiles.

Adxplorers

Jun 2026 – Jul 2026

Full-Stack AI Intern

Remote

- Designed and implemented **evaluation datasets and test cases for multiple LLMs**, assessing model responses across defined quality and performance criteria.
- Analyzed evaluation results to improve the **reliability and quality of model outputs**.

Nexera (Nexeraofficial.in)

Nov 2025 – Present

Founding Chief Technical Officer

Remote

- Led the technical development of a **production platform serving 2K+ daily users**, owning architecture, infrastructure, and key product decisions.
- Engineered **secure premium-content delivery** using Redis-based concurrent-stream protection and access-control workflows; built a centralized admin panel with **role-based access control** for premium content management.

TECHNICAL SKILLS

Languages: Python, SQL, C, JavaScript

Frameworks: Next.js, Node.js, FastAPI

AI/ML: RAG, AI Agents, Vector Databases, Llama, Claude

Systems / Infrastructure: Redis, Docker, Concurrent Systems, Job Queues, API Architecture, Secure Content Delivery.
